

# An innovative solution for oral motor treatment

## A Step-by-Step Series of Oral Motor Treatment Goals and Objectives

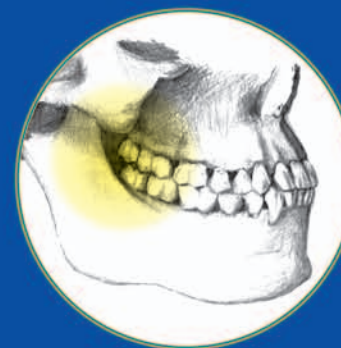

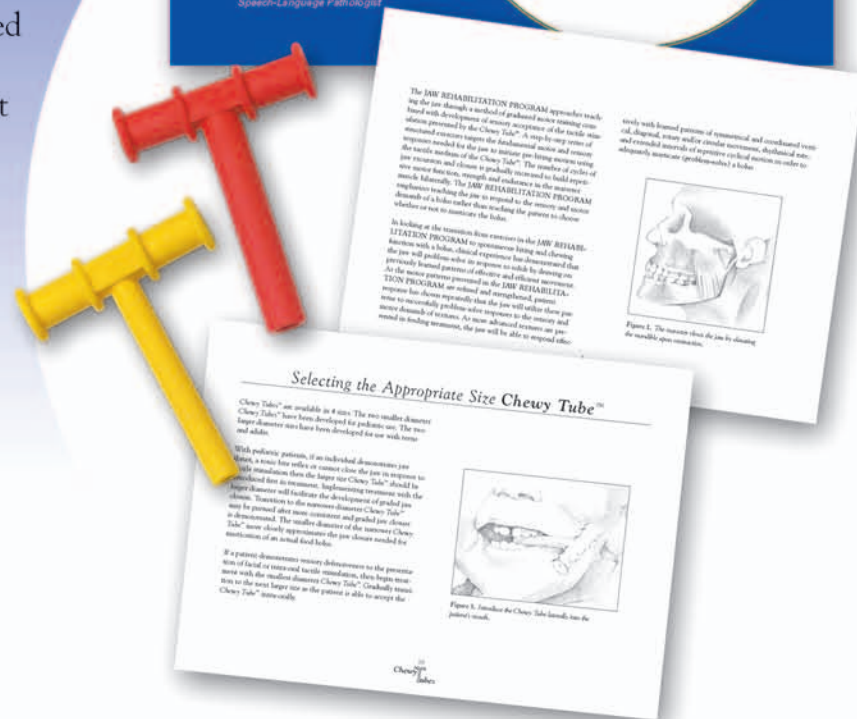

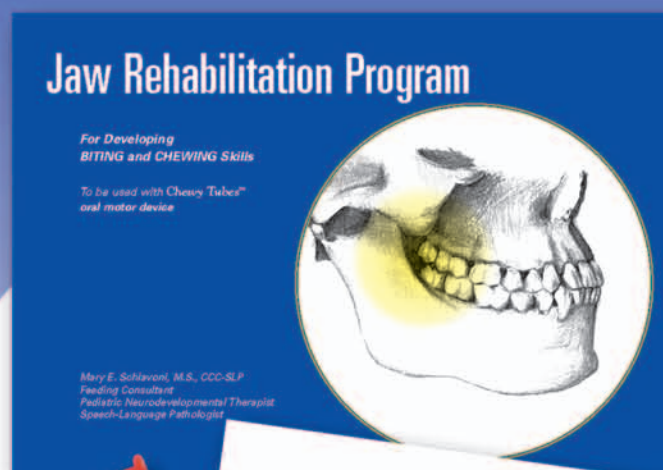

The Jaw Rehabilitation Program is a patented step-by-step series of Goals and Objectives designed to develop biting and chewing skills.

The Jaw Rehabilitation Program offers a sequenced progression of treatment exercises to initiate and strengthen mandibular function needed for successful mastication skill.

Progress can be easily documented by recording the last short-term objective achieved by the patient at each session.

Appropriate for individuals with the following diagnoses:

- Autism
- Cleft Palate
- Down Syndrome
- Dyspraxia
- Neuromuscular Disorders
- Cerebral Palsy
- Stroke
- Traumatic Brain Injury
- Dysarthria

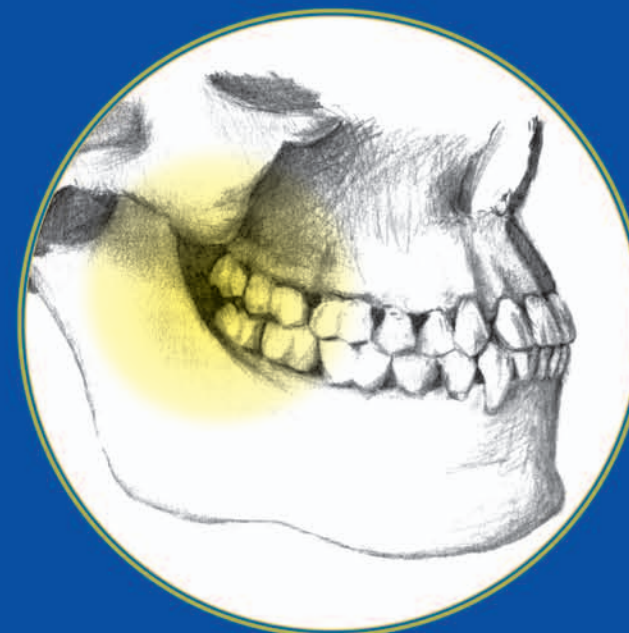

## How Do I Order the Jaw Rehabilitation Program for My Patients?
